- Suitable for internal or external applications in temperatures between -40°C to +80°C. BSEN60068-2-14

## Product Information

The Anti Vibration Rubber feet are a practical and versatile support solution for pipe work and cable trays. They can also be used for smaller outdoor condensing units or air source heat pump installations. The feet have a 41mm x 21mm 'bonded' in channel, which is recessed into the top face allowing you to use standard channel fixings to secure your services to the feet. Our range of feet are made from recycled SBR rubber, making them eco friendly and UV stable. They also have the added advantage of vibration and noise absorption which makes them the perfect product for roof or ground level installation.
