

Product Features

- 5cm x 10m Roll
- Wear-resistant PVC Surface
- Weatherproof & UV Resistant
- Unique Butyl rubber composition adhesive for strong viscosity
- Easy to cut
- Anti-adhesive release layer for easy install
- Air-tight Seal
- Anti-corrosive composition

Product Information

This Self-Adhesive Insulation Tape is specifically engineered to create robust, long-lasting seals on exposed pipework and fittings, such as those found in Air Source Heat Pump (ASHP) installations. Utilising a high-tack unique Butyl rubber adhesive, the tape provides an immediate, impenetrable vapour barrier that prevents condensation, protects insulation joints from moisture ingress, and shields materials from weather-related degradation.

Property	Description
Part Code	HPTAPE
Material	PVC / Butyl Rubber Adhesive
Dimensions	5 cm (Width) x 10 m (Length)
Thickness	0.4mm
Temperature	-30°C ~ 80°C
Colour	Black
Adhesive/ Material Type	Self-Adhesive Butyl rubber composition
Packaging	Individual Roll
